

United States rock band Tyketto celebrate their 25th anniversary!

AOR rockers Tyketto release their fifth studio album, REACH, October 2016 on Frontiers Records

After five years of relentless touring on some of the most prestigious stages on the planet, Tyketto took their new infusion of energy into the studio in the spring of 2016. The sessions took place at the legendary Rockfield Studios in Wales (Queen, Rush, Oasis).

Lead vocalist Danny Vaughn comments, "Although we only had planned on recording ten songs for REACH, we were so pleased with everything, we decided to keep all twelve songs on the record. We unanimously decided on REACH as the title of the album, as it defines who this band is in 2016. We have a new energy, some incredible new members, and a fresh outlook toward the future. All of us have pushed each other beyond our limits to make what we feel is a pinnacle record in our catalog."

Drummer and founding member Michael Clayton Arbeeny adds, "Many bands who have been out as long as we have feel they need to fit into a preconceived notion of what their fans expect to hear. Following in the footsteps of icons such as Queen, Led Zeppelin, and Prince, we have decided to expand our musical boundaries and introduce our friends around the world to Tyketto 2016. Rest assured that all the songs on REACH still carry the trademark melodies and choruses our fans have grown to love over

the decades. The band is feeling stronger and performing better than ever and we can't wait to share this music with the world."

In addition to Vaughn and Arbeeny, the unstoppable 2016 lineup includes Chris Green (guitars and vocals), Ged Rylands (keyboards and vocals) and Chris Childs (bass).

A video for the leadoff song, "Reach," will be released this fall, and an eleven country tour to support the album commences in October.

Band biography

Tyketto exploded onto the international music scene in 1991 with their acclaimed Geffen debut, “Don’t Come Easy”, which introduced the iconic hits, “Forever Young”, “Wings”, “Seasons” and “Standing Alone”. The album produced a #1 MTV request video on both sides of the Atlantic and two AOR breaker singles.

Their 1994 follow up, “Strength in Numbers” was a European hit, and the video for “The End Of The Summer Days” was a top request on both MTV UK and Europe. The band continues to tour, and draws big crowds around the world with their high energy concerts.

“DIG IN DEEP”, (available on Frontiers Records), entered the UK Official Radio 1 rock chart at #11 next to Shinedown and Foo Fighters, and entered HMV’s rock-metal album chart
